PID Controller Series for multiple Applications

> Global' s PID Controller series comes in varies sizes and different configuration. Configuration is highly customisable based on user's application.

*Features

- Control of Temperature, Pressure, Flow
- PID + Fuzzy Algorithm for excellent control
- Advanced options for Motor Valve control
- SCR/TRIC Trigger
- Programmable RAMP/SOAK

*User must inform the features required as every feature is an add-on module on the basic PID controller
