

Process pH Electrode Holder

5002 P - R

Features

- Adjustable Submersion length
- Integrated Electrode wash jet
- Manual retract KEEP WET Electrode storage position
- Wetted Parts in PVC

Model 5002P – R is a submersion pH / ORP Electrode holder especially designed for use in Waste Water applications.

The assembly has a 3/4" NPT thread for pH or ORP Electrode mounting.

The design allows ON SITE adjustment of the immersion depth. Integrated into the design is a specially positioned Water jet for cleaning of the pH / ORP electrode.

The electrode has an ingenious Retractable arrangement that can keep the electrode wet in case the liquid level falls below the electrode. This preserves the electrode in good condition, when not in use.

The electrode holder is available in PVC .

TECHNICAL DATA

| | |
|----------------------|--|
| Mounting | : DN 100 sliding Flange (220 OD, 194 PCD) |
| Wetted Parts | : PVC , uPVC |
| Submersion pipe | : 50mm |
| Wash Connection | : 1/2" BSPM |
| Electrode connection | : 3/4" NPTF |
