

FLOW CHAMBER ON LINE PH MEASUREMENTS

FEATURES

- All PTFE wetted parts
- Flange mounted Flow through assembly.
- Holds 3/4" MNPT process pH electrode
- Versions for 12mm dia electrodes

Model 5017 Flow through pH electrode Holder is a complete, ready to use solution for pH measurements in process pipelines. It is ideally suited for process pH measurements in recirculation lines of process reactors, especially Glass lined reactors. It is also recommended in applications where the batch Temperatures vary beyond the electrode temperature ratings, so that the electrode can be put into service only in suitable conditions when required.
